NARCLOCK

Introducing
THE VALIDIKEY 2 VAULT

Designed and developed to meet the security needs of small, medium and large scale facilities.

- » Affordable
- » Flexible
- » Scalable
- » Auditable
- » Stand-Alone Server
- » Secure CyberKey Storage

Keypad Display
LCD Touch Screen that Displays Status and Responds to Input from Button Presses.

Compatible RFID Cards
Reads the Unique ID from Unencrypted 13.56 MHz, ISO 14443 Type A & B & ISO 15693 Format Cards

Connections
Ethernet Via RJ45 and Wireless Radio for WLAN

The ValidiKey 2 can function as a stand-alone system, or it can be scalable, so that numerous vaults can communicate with larger or multiple sites.

Access is granted with an RFID Card or keypad number entered on its LCD touch display. Combining with a PIN ensures the highest security. The ValidiKey 2 offers managers the ability to grant immediate access, giving users faster, more convenient control of their facilities than ever before!
